CLIMACOOOL® 

A combination of performance fabrics, open mesh and ventilation channels keeps cool air flowing in and heat and sweat flowing out.

You stay dry, comfortable and performing at your peak in even the most heated competition.

CLIMALITE® 

Light, breathable fabrics worn close to the skin conduct heat and sweat away from the body to keep you cool and dry in warm conditions.

CLIMAPROOF® 

CLIMAPROOF® is breathable weather protection in even the harshest of wind, rain and storm conditions by acting as a barrier to these elements. At the same time it allows heat and sweat to escape through evaporation.

- WIND:** Great lightweight wind protection
- RAIN:** Great wind and rain protection
- STORM:** Protects you even in the harshest weather

FORMOTION™

Engineered for maximum freedom of football-specific movement, FORMOTION™ technology is designed to optimize fit and comfort while in motion.

- 3D-engineered pattern for enhanced fit.
- Specific fabric combinations for maximum freedom of movement.
- Sculpted hem and leg openings to accommodate specific football movement.
- Provides ultimate performance and comfort while in motion.

CLIMACOOOL® with FLOWMAPPING

Using FLOWMAPPING, researchers were able to identify the body's high-velocity airflow zones. Anatomically configured inlets have been properly placed in these areas to channel peak airflow into the garment and over the player's skin to provide maximum ventilation and cooling during intense play.

CLIMACOOOL® just got cooler – with CLIMACOOOL® football apparel designed with FLOWMAPPING.
